**PEHN** Electric Boat 530

## **PEHN Electric Boat 530**

**This classic in its new edition has been providing water fun on the lake for decades and scores with various motor and equipment variants.**

---

### **Elevated Driving Pleasure**

The beautiful teak wood, robust and high-quality workmanship, and attention to detail ensure a cohesive overall package that brings joy for many years.

The boat is approved for 5 people or four adults and two children and has an empty weight of around 540 kg. It is optimally equipped for relaxed hours on the lake.

Two motor strengths of 800 or 1300 watts are available. With both variants, the electric boat is license-free and sufficiently powerful.

### **Timeless, energy-efficient, with solar option**

The timeless elegant design, economical hull construction combined with a highly efficient electric motor and modern battery technology enable long ranges. A drive purely with solar and socket is also possible.

### **Functional Extras**

A battery monitor shows the remaining driving time in percent and hours, the boat glides quietly over the lake with a stepless throttle. Whether anchor, bathing ladder, sun awning, marine radio or the foldable bucket - The additional equipment leaves no wishes unfulfilled!

## **Enjoyment for generations.**

Backrest is extendable and serves as a sunbed

Table and table base are rotatable and removable

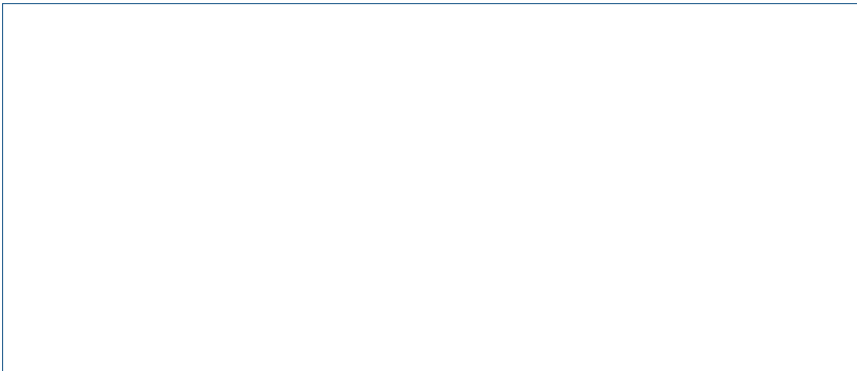

Steering - Steering wheel optionally starboard or port

Motor optionally as underwater tube motor or outboard

Batteries and technology under the sunbed

Reinforced keel - Ramp protection
